family tent

shelter and protection solutions

shelter

The basic family tent, Sabirah, has been deployed to countries like Sudan, Eritrea, Mozambique, Rwanda, Burundi to mention some. This compact and light-weight tent is very quickly erected, and offers accommodation to a family of four to six people. The standard version is furnished with a ground sheet to improve the living conditions.

Ventilation is secured by means of windows along the lower part of the tent in combination with a vent at the top of shelter. Additional ventilation may be obtained by opening the sidewalls.

The Sabirah design has constituted the basic shelter in several humanitarian operations carried out the past decades, and is in compliance with standard UN specifications.

Sabirah is one of the items that ROFI Industrier keep in stock through our commitment in NOREPS, Norwegian Emergency Preparedness System. 24 hours a day, 365 days a year, we are able to deliver the NOREPS commodities to an international airport within 24 hours, and upon several occasions we have accordingly performed. Our technicians are available for organising and supervising partial or complete turn-key projects in the field. This professional assistance is also available 24 hours a day, year around.

ROFI Industrier as represents more than 60 years of experience within the textile industry. A comprehensive integration with our suppliers and partners enable us to meet the requirements for progressive development, system solutions and a stock-hold of selected items. We continuously maintain our certificate covering quality assurance/quality control.
