

# HMK MULTI- & MEGASPACE TRAILERS

## The HMK Group of today

HMK Group is one of the leading manufacturers of custom made solutions for the transport industry in Scandinavia. We make products of steel, aluminium and glass fibre.

The group consists of two independent companies, HMK Industri A/S and HMK Bilcon A/S.

HMK Industri was founded back in 1895, and HMK Bilcon was established in 1955 and became part of the group in the 1990'es.

HMK Bilcon is specialized in intelligent transport solutions, whereas HMK Industri has thorough knowledge in Multispace Trailers and Containers.

HMK Group has domicile in the northern part of Denmark with divisions in Hjørring and Aalborg.

## The unique and mobile solution

HMK Group has few standard solutions. Practically all our products are made in close collaboration with our clients at home and abroad, creating unique solutions by utilizing our wide ranged and deep technological know-how.

No matter what the need and purpose of the client might be, it is very important to us to create increased value for the client by means of our innovative mobile solutions. We make exactly the product requested by the client – in real craftsman quality.

Consequently the staff members are our most important resource. HMK Group employs about 200 well-qualified and responsible persons who keep the wheels turning.

## Multispace Mammography Unit

Multispace Trailer used as a mobile mammography screening unit: Capable of 12 examinations an hour this unit excels in efficiency and productivity. Via telecommunications the examination results are transferred to the doctors stationed at the nearby hospital.

## Multispace M - Blood Donation Unit

Multispace M Trailer used as a mobile blood donation unit consisting of 2 x 1.85 meter pods on both sides. In use by the Danish blood collecting services the trailer has increased the total portions collected due to the fact that blood collection comes to the donor instead of the donor coming to the hospitals. Being stationed next to companies, city centers etc. the increased quantities collected means that the cost per portion is almost the same compared to collecting in fixed locations.

## Multispace S Trailer as Mobile Class Room

Multispace S with 2 x 1.1 meter pods, interior with full teaching AV equipment, desks and seating for 20+ pupils. Toilet and kitchen facilities as well as internal power generator and internet connections can be installed, giving the optimum teaching facilities on location for companies, universities or military information services.

## Mobile Training Unit for Aircraft Technicians

Multispace L Trailer used for training technicians of the RDAF. No less than 3 pods can be extracted totalling the floor area at 73m<sup>2</sup>. The unit is equipped with 10 work benches and a centre school desk with AV tools. Kitchen and toilet facilities, incl. water and sewage. Capable of operating independently with own power supply, A/C and floor heating. This unit equals a stationary teaching facility. Giving its mobility it is possible to standardize training and save the costs of equipping several fixed training facilities.

## Megaspace L - TV Transmission Unit

Megaspace L Trailer used as mobile TV Transmission Unit. It carries own internal power supply and A/C. Fully equipped with computers and 30+ TV screens to control transmissions from any location. This trailer has more than 400 km of cables.

## Multispace L - Command & Control Station

Multispace L Truck used as Command & Control Unit by the Danish Civil Defense. It carries own internal power supply, A/C and floor heating. Fully equipped with modern telecommunication systems, TV screens and computers this unit is ideally suited for the role as a mobile command station. The unit is on constant alert as a part of the Danish Civil Defense organisation in emergencies and catastrophic events.

## Megaspace S Exhibition Trailer

Megaspace S Trailer used as a exhibition/hospitality unit. It carries own internal power supply and A/C. Side access for easy entrance. Floor is in one level up to 11.3 meters length.

The trailer can be supplied in a basic version only consisting of floor, roof, side walls or fully equipped with all possible extras such as telecommunications, toilet, floor heating, extra windows, doors etc. The list is long!

Removable internal walls can be supplied so that the unit can have separate meeting rooms, but also your ideas of interior decoration and design can be incooperated in the pre-building phase. We will do our outmost in making the final version uniquely suited for your purposes!

# Multispace XL Exhibition Trailer

Multispace XL Exhibition and Hospitality Trailer with 2 x 1.85 meter pods and extractable top. The trailer shown was used by danish event company MB Show in a roadshow for Hewlett Packard in Denmark. After huge succes they expanded the cooperation to an 8-month roadshow in all of Europe.

2-story and walkable roofing on the pods makes this unit very attractive for companies wanting an eye-catching effect of their roadshow. Kitchen facilities, telecommunications system and the possibility of separate meeting room behind removable walls makes the Multispace XL a perfect location for bringing the message to the customer!

## Megaspace L - Mobile Hospital

Megaspace L Trailer used as Mobile Hospital in a 7-unit configuration. The Mobile Hospital is equipped as a normal hospital with OR, ER, Admission Rooms, X-ray and even Staff Room with washing facilities.

Beneath you can see the first Mobile Hospital sold to Saudi Arabia. It will be used for giving extra capacity during the muslim pilgrimage to Mecca and as a fast deployable emergency unit for use in catastrophic events such as earthquakes and tsunamis.

**FIRST DEPLOYMENT OF THE MOBILE HOSPITAL IN MECCA, SAUDI ARABIA, 2008**
